

AN EASY GUIDE TO GAZA, ISRAEL AND IRAN IN 2026

With an enormous amount of revisionist history around, it can be difficult to determine what the truth is, so here are the key points:

- The 'Land of Israel' (and subsequent names) has existed since biblical times. The 2nd millennium BCE to be precise, while Islam only arrived in the 7th century.
- The Israeli people left Gaza in 2005.
- Hamas (partly funded by Iran) was elected in 2006 as the population has a higher level of Islamic extremists. The Iranian people, on the other hand, have had Islam forced on them, whether that is their religious belief or not—they have no choice.
- In 2007, Hamas fought Fatah for complete control of Gaza during the “Battle of Gaza”.
- Hamas believes that no Jew should exist anywhere in Palestine, so no peace plan has ever been successful.
- Hamas has a history of terrorism, and on 7th October 2023, 7,000 Hamas fighters launched an attack on Israel, killing 1,195, mainly young people.
- Immediately, college campuses began chanting “Free Palestine”. This had nothing to do with the IDF’s retaliation against Gaza because they were not even in Gaza yet. Instead, it was the usual belief of those loyal to Hamas that no Jew should exist in Palestine despite their long history in the area.
- Hamas has tens of thousands of fighters, and during 2024 and 2025, they recruited another 15,000 fighters. This is one of the reasons why the Ayatollah-controlled regime in Iran and the Palestinians were disliked so much by other Muslim-majority countries.
- Shortly after the war broke out, the Associated Press (AP) and Reuters both reported that ‘The Palestinian Center for Policy Survey and Research’ (PCPSR) found that overall, 52% of people living in Gaza and 85% of Palestinians living in the West Bank, so 72% of Palestinians in total, supported the Hamas attacks on Israel. This was allowed to be released at the time as Joseph Biden was president, and the liberal media knew there was no prospect of him being able to achieve peace in the Middle East.
- Hamas are masters at propaganda, and had at least 55,000 fighters, and an extensive tunnel system to hide in that they began constructing after they were elected.
- The majority of Gaza is made up of Hamas fighters, their wives, children and sympathisers. Hamas began hiding behind women and children when Israel invaded.
- Hamas propaganda began recording the majority of deaths as civilian, so natural causes and fighter deaths were almost all recorded as civilian deaths in order to claim “genocide”.

- Hamas controlled the majority of food aid into Gaza too by looting the hundreds of trucks that entered daily. This was so they could falsely claim there was a “famine”.
- In 1979, the Iranian Royal Family was overthrown in the Iranian Revolution. This began the rise of the terrorist state.
- Hamas is backed by Iran, so Israel bombed several other countries in the Middle East, who were actively sending terrorist groups, e.g. Hezbollah and the Houthis, to Israel because they wanted to eradicate all Jews from their homeland.
- Further protests continued around the world in support of Hamas because they were funded/had links with Hamas, so many people, liberals in particular, became useful idiots to the Hamas propaganda machine. They basically aided terrorism.
- In 1979 the Iranian Royal Family was overthrown in the Iranian Revolution, which
- Operation “Midnight Hammer” (22nd June 2025) saw the nuclear sites in Iran destroyed by America. Iran has hundreds of missiles, and they have always attempted to create nuclear weapons because they are a terrorist-funding state.
- Between June 2025 and February 2026, the United States continued with the decades-long quest to achieve a deal with the Ayatollah of Iran to ensure that they would pledge never to develop nuclear weapons, but as usual, this was unsuccessful as it was for all previous presidents since the 1980s. Iran was given every opportunity to make a deal, and a deadline was set.
- On the 28th of March 2026, the United States, under President Trump, launched operation “Epic Fury” designed to eliminate Iran’s navy and missiles. Israel also participated in the bombings. The Ayatollah was killed during the attacks on Iran.
- Israel had previously invaded Lebanon in 2024 after around a year of conflict with Hezbollah, who had launched missiles into Israel as they were loyal to Iran and Hamas. So this is why Israel is again bombing Lebanon in 2026 as Hezbollah is funded by Iran, and is firing on Israel.
- Iran and its proxies retaliated (showing their true colours) and attacked sites in twelve different countries, including the Burj Al Arab hotel in Dubai, an airport in Qatar and a United States embassy in Saudi Arabia. The bombing in Saudi Arabia now makes Saudi Arabia on the side of America and Israel (as of March 2006), with them all united behind fanatical Islamic extremists who have been illegitimately in control of Iran since 1979.
- The Iranian people celebrated America and Israel’s attack on Iran because the Iranian people love Prime Minister Benjamin Netanyahu of Israel and wanted their freedom from the brutal regime, whereas the Palestinian people (and pro-Palestinian marchers) love Iran’s terrorist-funded Hamas regime.
